¶

Ans:

- SUSE
- RHEL

4. Which of the following are important facilities Linux distributions provide?

Ans:

- Make it easy to install Linux on a wide variety of hardware platforms
- Form the connecting bridge between end users and upstream developers, making sure each is aware of the other's situations
- Provide updates, upgrades and bug and security fixes to end user systems in a timely and controlled fashion
- Make sure all the different software on the system works together and is updated at once without conflicts

5. Select all true answers:

Ans:

- The term Linux really applies only to the core kernel, not the entire operating system.
- Linux borrowed heavily from basic UNIX features, but is not actually an implementation of the UNIX operating system.
