

**1. OSS projects should explicitly encourage diversity with respect to (Select all answers that apply):**

***Ans:***

- Sex and gender identity
- National origin and language
- Race

**2. The majority of OSS projects carry out their discussions in English. Therefore (Select all answers that apply):**

***Ans: One should always speak as clearly as possible, and while not being dull, think about the audience and what they will be familiar with***

**3. With respect to criticism, an OSS contributor and reviewer should (Select all answers that apply):**

***Ans:***

- Answer thoughtfully and point out where one agrees or disagrees, where changes are accepted or not.
- Not hold back, it is important to have open and forthright discussion

**4. Some one on an OSS mailing list introduces a political aside and perhaps a preference during a technical discussion. Appropriate responses include (Select all correct answers):**

***Ans:***

- Ignore the point and just address the technical issues as needed.
- Acknowledge the issue but briefly without putting down anyone with differing opinions. Avoid amplifying

**5. You propose a new way of doing something, or adding a new feature. Another contributor points out this idea was reject previously. You should (Select all answers that apply):**

***Ans:***

- Study the previous discussion and see whether it applies, including whether or not differences between your ideas and the old ones were not seen
- Ask whether or not technical abilities have evolved to the point where something that was not feasible can be done today
- Ask whether the need for this feature has grown; the earlier discussion may have been premature
